

Shubham Bahirat

Python Developer | AI/ML Engineer | Django Developer | Backend Developer
shubhambahirat4018@gmail.com | +91 9075608920 | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Results-driven Python Developer and AI/ML Engineer with 3+ years of experience building scalable backend systems, RESTful APIs, and AI-powered applications. Proficient in Django, Flask, FastAPI, and Django REST Framework (DRF) for backend development, alongside machine learning and deep learning frameworks including Scikit-learn, TensorFlow, and PyTorch. Hands-on experience with data processing (Pandas, NumPy), NLP, model training, and ML pipeline deployment. Proven track record in async programming, CI/CD automation, and cloud deployment (AWS EC2, Docker) across fintech, logistics, and compliance domains. Committed to clean code, agile collaboration, and delivering high-performance real-world solutions.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL

Backend Frameworks: Django, Django REST Framework (DRF), Flask, FastAPI

AI / ML: Machine Learning, Deep Learning, Neural Networks, NLP, TensorFlow, PyTorch, Scikit-learn, LSTM, Logistic Regression, Decision Tree, Feature Engineering

Data & Analytics: Pandas, NumPy, Matplotlib, Data Preprocessing, ML Pipeline, Model Training & Deployment

Databases: PostgreSQL, MySQL, Django ORM, Database Query Optimization

DevOps & Cloud: Docker, Kubernetes, AWS EC2, GitHub Actions, GitLab CI/CD, Git

Web Technologies: RESTful API Design, Microservices, HTML5, CSS3, Bootstrap, React JS

Tools & Concepts: Async Programming, Concurrency, Unit Testing, Pytest, OOP, System Design, Agile/Scrum

PROFESSIONAL EXPERIENCE

Python Developer

Lemon Technologies

Apr 2025 – Present

Surat, India

- Architected and delivered a full-featured Learning Management System (LMS) using Django and PostgreSQL, implementing quiz logic, automated result evaluation, and performance-optimized backend APIs with Django REST Framework (DRF).
- Engineered bot automation system leveraging async programming and concurrency techniques, reducing file-processing execution time by 30% and improving overall system scalability.
- Led the Rough Comparison Tool (RCT) project, end-to-end refactored legacy codebase, optimized database queries, improved UI/UX, and managed client communication.
- Transformed monolithic platform into a Single-Page Application (SPA), significantly improving page load times and user experience.
- Established CI/CD pipeline with GitHub Actions, reducing deployment errors by 30% and enabling reliable continuous delivery.
- Integrated Django ORM query optimizations and PostgreSQL indexing strategies, achieving measurable improvements in API response times.

Python Developer

Texcarp Consulting

Dec 2023 – Mar 2025

Pune, India

- Designed and implemented algorithmic trading strategies in Python, leveraging Pandas and NumPy for data processing, backtesting, and real-time market trend analysis.
- Developed and deployed machine learning models (LSTM, Decision Tree, Logistic Regression) to analyze market data and generate predictive trading signals.
- Independently revived and enhanced the Algorithms-15 Python-based project, re-engineered non-functional components using Python and Django, improving speed, robustness, and scalability.
- Deployed and managed algorithmic trading software on AWS EC2, ensuring high availability, performance monitoring, and seamless cloud operations.

- Integrated ML pipeline for feature engineering, model training, and automated signal generation using Scikit-learn and Matplotlib.

Full Stack Developer (Training)

Jul 2022 – May 2023

FirstBit Solution

Pune, India

- Completed intensive full-stack training covering Python backend (Django, Flask), RESTful API design, frontend technologies (HTML5, CSS3, React JS), and database management (MySQL, PostgreSQL).
- Built end-to-end web applications integrating backend APIs with dynamic frontend interfaces, establishing a strong foundation in software engineering best practices.

KEY PROJECTS

LMS – Learning Management System

Apr 2025 – May 2025

Tech Stack: *Django, DRF, PostgreSQL, Bootstrap, JavaScript* | *Lemon Technologies*

- Built end-to-end LMS with Django REST Framework (DRF), featuring quiz engine, automated evaluation, result tracking, and dynamic leaderboard.
- Designed scalable backend APIs with optimized PostgreSQL queries, reducing database load using indexing and query optimization techniques.
- Integrated responsive UI using Django templates, Bootstrap, and JavaScript for a seamless cross-device experience.

External Bot Automation

May 2025 – Present

Tech Stack: *Django, Pandas, PostgreSQL, Async Python* | *Lemon Technologies*

- Engineered high-performance file automation bot using Python async functions and concurrency, cutting execution time by 30%.
- Implemented intelligent data processing pipelines with Pandas for large-scale file handling and transformation.

Rough Comparison Tool (RCT)

May 2025 – Present

Tech Stack: *Django, Pandas, PostgreSQL, JavaScript, Bootstrap* | *Lemon Technologies*

- Led full lifecycle of RCT requirements gathering, architecture design, development, and client delivery.
- Refactored and optimized legacy codebase for performance, maintainability, and reduced client operational overhead.

Algorithms-15 – Algorithmic Trading System

Feb 2024 – Sep 2024

Tech Stack: *Python, Java, Spring Boot, Scikit-learn, Pandas, AWS EC2* | *Texcarp Consulting*

- Revived and re-engineered a non-functional Java-based trading algorithm; integrated ML models for market prediction and strategy optimization.
- Deployed system on AWS EC2 with automated monitoring, ensuring high availability for live trading operations.

EDUCATION

Bachelor of Engineering

2020 – 2023

Shree Ramchandra College of Engineering

Pune, India
